28 th July 28, 2009	http://www.abc.net.au/	 <p>The screenshot shows the ABC News website interface. On the left, there's a main news story titled 'Burkley's chance in Pies succession deal'. In the center, there's a 'Foreign Correspondent' section. On the right, there's a video player showing two men in suits, with the headline 'Abbott backs 16pc Turnbull'. Below the video, the text reads: '27 July 2009, 18:00:24 (AEST) Liberal frontbencher Tony Abbott says he is certain Malcolm Turnbull will lead the Coalition to the next election, despite the Opposition Leader's record low rating in an opinion poll out today. >more'. At the bottom of the video player, there are navigation links: 'Just In Australia World Business Entertainment Opinion Sport'.</p> <p>Formed in boxes the designer uses tags to make it look sophisticated and easy to handle.</p> <p>As a news channel abc (on its website shows a range of things that showcase on the channel.) links are easy to read and categorized very well.</p> <p>What I really find interesting about the site is the amount of interaction between pictures and news broadcasts.</p>

<http://blogs.abc.net.au/heywire/>

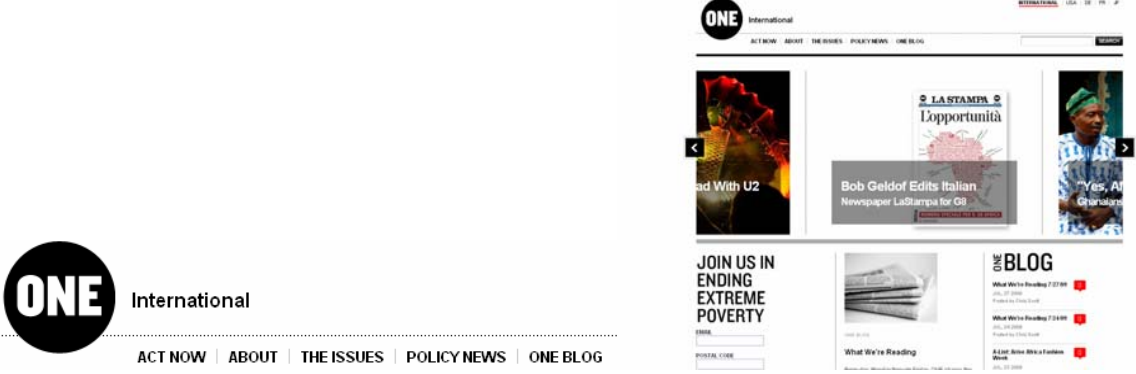

Nice graphic running down the side of the site, used very as identification on posters and here as well. The design is really vibrant and is easy on the eye. Intended for abc radio for youth, it incorporates stylish html website design and easy access links and buttons is easy to replicate although does not look the best.

<http://www.jackjohnsonmusic.com/>

		<p>Jack Johnson's website is a great music site with video footage and screenshots covering the sight. It informs the viewer about his history and albums which he has made and it satisfies the regular Jack Johnson fan. What inspires me about this website is the wide array of album covers and personalization.</p>
<p>28th July 28, 2009</p>	<p>http://www.guysebastian.com.au/</p>	 <p>A very simple website the designers have faded a picture of the artist into the screen, this might be something to think about putting in my website.</p>
<p>28th July 28, 2009</p>	<p>http://76.12.177.9/flash/</p>	 <p>The website uses flash to its advantage, the loading bar especially caught my eye it had a very</p>

		<p>sophisticated and stylish feel. Buttons looked like badges and the banner was clear. A very arty website that is one of the best I've seen of its kind.</p>
<p>28th July 28, 2009</p>	<p>http://www.one.org/international/</p>	 <p>The screenshot shows the ONE International website. At the top right is the ONE International logo and a navigation menu with links: ACT NOW, ABOUT, THE ISSUES, POLICY NEWS, ONE BLOG. Below the menu is a sliding photo album with three visible images: 'ad With U2', 'Bob Geldof Edits Italian Newspaper L'Espresso for OI', and 'Yes, Africa'. Below the album is a call to action: 'JOIN US IN ENDING EXTREME POVERTY' with a 'SIGN UP' button and a 'POSTAL CODE' input field. To the right is a 'WHAT WE'RE READING' section with three items, each with a red heart icon and a date.</p> <p>ONE International</p> <p>ACT NOW ABOUT THE ISSUES POLICY NEWS ONE BLOG</p> <p>The one website is very comprehensive and backs up its claim with visual back up and is very easy to use. Its sliding photo album keeps the user up to date with what's happening in the world in terms of poverty. The menu bare I like it is simple and easy to use and can be identified as the one website easily.</p>
